

LOW TEMPERATURE CHILLER

ETC's Low Temperature Chiller is custom designed for general, industrial, laboratory and OEM applications. ETC's chillers are versatile and work well with a variety of environmentally friendly heat transfer fluids or can be air-cooled. With it's wide range of capacities, ETC's low temperature chiller is an ideal solution to your process chiller needs.

SPECIFICATIONS

APPLICATIONS

Custom Air Handling Application Per Client Specification

FEATURES

Portable and light weight

Robust, heavy duty construction

Wide capacity range

Green energy efficient design with capacity control

Fluid temperatures down to -50°F

Wide range of fluid supply pressures

PLC controlled with digital control panel
